

# A3-TEAM B.V.

Advice - installation & maintenance - sales - design & calculation - management

## What does A3-TEAM do?

A3 stands for “Accomplished As Agreed”. Completing projects as agreed is the foundation of our company. This can be confirmed by many references and is also the reason that we build long-lasting relationships.

Our activities revolve around technical installations. This includes advice, calculation, drawing, installation, commissioning and management. We currently do this for >90% in the maritime and offshore market. Purely because we really like that market and focus on it.

Technical installations sound general. You can think of bilge, ballast, gray and black water, but also scrubber (cleaning exhaust gases at sea), process and technical water.

We have a number of specializations including;

**Drinking water, Legionella, Pipingsystems and Materials Science.**

In addition, we also supply all kinds of materials such as fittings, couplings, valves, control valves and hoses for the above installations and everything related to the engines (cooling, turbo, etc.)

## History

We started in 2008 as a sole proprietorship. Since 2021 we have accommodated our activities in A3-TEAM B.V.

Within A3-TEAM, 3 trade names are active.

## Certificates etc.

Besides -of course- fully VCA, we also have many certificates in terms of safety such as BOSIET (Basic Offshore Safety Induction & Emergency Training), CA-EBS (Compressed Air Emergency Breathing System for helicopter flights) and STCW (Standards of Training, Certification and Watchkeeping for seafarers).

Also, we have many technical certificates to be able to work with certain materials or installations. In addition, also sailing licenses, seaman's books and service booklets

In short; knowledge is power!

## Contact

## What/who is A3-TEAM?

Although we write and speak in the “we” form, the B.V. is 1 person, Jeroen Stelling-Freyee.

However, we have a large number of independent technicians. For each project we put together a team with the best people for the job. Our strengths are:

1. We work with motivated technicians, who know what a customer wants.
2. We are very communicative towards the customer and v.v.
3. Clean and neatly work is more than a must for us.

The above is verifiable at many companies. In addition, we have a large network of suppliers, specialists, policymakers and government.

## Locations

Our projects are not only located in the Netherlands, but also worldwide

## Trade names

A3-TEAM B.V. owns the following trade names:
